

### **ABSTRACT OF THE DISCLOSURE**

In a recording medium, a program for making a computer execute processing is stored. The processing includes detecting a recipient's domain name of an e-mail to be transmitted with data attached to the e-mail from a recipient's address of the e-mail, deciding a format of the data depending on the detected recipient's domain name, formatting the data into the decided format, and transmitting the data formatted into the decided format to the recipient's address as an attachment of the e-mail.
